

High School

Do we need to be doing school at home?

Typically no. Whatever classes you are taking with us, you can be sure they are doing enough with us to not need any supplementation. If you are not doing a subject with us and need it, then you will need to use a curriculum for that subject.

What are our class options?

Tuesday 9-3:30 (180.00 per month)

And/or

Wednesday 9-3:30 (180.00 per month)

If doing both days, the cost would be 300.00 per month.

What is the difference between the two days?

Tuesday is the main academic day. That day will cover English, Science, and History. Students will be given a survey after registration to choose particular classes in those disciplines and to let us know what they are missing/need for graduation.

Wednesday is their extra day that will have extracurricular opportunities, special speakers, field trips, etc. We are going to let a lot of that be interest based and let the students help choose what we learn.

Will they have homework?

Yes, students should expect to be doing work for their classes throughout the week and not just when they attend class.

What about math?

Math classes will be offered on an as needed basis with our tutors for an extra cost. If you need math, please note that at the bottom of your class selection sheet so that we can begin to sort students into groups. We will do our best to work the schedule to be beneficial to the student taking the class but also be sure they aren't missing other classes.

I have questions about graduation, credits, transcripts, etc.

Please email us to set up a time to talk about all of these things!
